Health & Safety

Construction Safety

Construction safety is now becoming potentially more contentious with recent and new changes to fire and safety legislation and enforcement.

We not only specialise in construction safety consultancy and support but also building control and fire safety engineering including:

- > Construction Project and planning supervisor services
- > Construction and Fire Safety Engineered solutions and strategy
- > Fire Safety and Design
- > Accessibility, Discrimination and Design
- > Construction Risk Assessments and Method Statements
- > Compliance with Construction Design and Management Regulations
- > Site Auditing and Site Inspections
- > Sub Contractor Safety Audits and Safety Assessments
- > Construction Safety Training
